

Roulette

This is a fast-moving but easy game to play. Players place their bets using casino chips or specially colored roulette chips designated for each roulette game. Players determine the value of their chips at time of buy-in. There are 36 numbers plus 0 and 00 in a variety of combinations to place bets on. Additional bets include red/black, odd/even, 1 to 18, 19 to 36, first 12 numbers, second 12 numbers and third 12 numbers, three separate column bets and the race track. The dealer then spins the ball, and if it lands on a number corresponding to the number under the player's chip, the player wins. All other chips are removed from the table. The payoff is determined by how many numbers are covered by the player's chip.
